

1. Overall Trip Header & Day Navigation

- Trip Title: At the top, the user sees the main destination or title of their trip (e.g., "Paris Summer Trip").
- Scrollable Days: The schedule is cleanly divided into scrollable sections or tabs for Day 1, Day 2, Day 3, etc., allowing them to easily browse their plan day-by-day.

2. Chronological Activity Cards (`timeline_card.dart`)

Within each day, the user sees individual events rendered as cards. Each card displays:

- Category Icons: Custom visual icons matching the activity type so the user can see at a glance what is next (e.g., a plane or train icon for transport, a bed for hotels, a camera for sightseeing, and a plate/fork for food).
- Time Tags: Clear start and end times (e.g., 09:00 AM – 11:30 AM) showing exactly when each activity happens.
- Cost Tags: Individual price estimates displayed on each card.

Depending on the activity type, here is the specific details the user sees:

- TRANSPORT: A card showing the travel mode, title (e.g., *"Flight to Rome"* or *"Train to Paris"*), and description details (e.g., *train name and time*).
- HOTEL: A card suggesting where they are staying, including the hotel name and estimated cost.
- SIGHTSEEING: Sightseeing cards displaying top local points of interest, a brief description of what to do there, and any expected entry fees.
- FOOD: Cards for lunch, dinner, or local food recommendations.

3. Financial Summary & Active Tracking

- Trip Summary & Cost Estimator: A dedicated panel displaying an aggregated budget overview, calculating total estimated expenses for transit, hotel stays, food, and sightseeing entry fees

Step 1: You Type Your Plan

You open the app and type a normal, conversational sentence into the prompt box:

"I want to go to Paris by train, stay for 2 days, and see the Eiffel Tower."

Step 2: LLM Extracts the Key Details

The app sends your text to LLM. The AI acts as the "brain," quickly reading your sentence and organizing it into clean parameters:

- Destination: Paris
- Duration: 2 Days
- Transport: Train
- Key Spot: Eiffel Tower

Step 3: The App Searches Your Local Database

The app takes these clean parameters and instantly searches its local SQLite database to pull matching travel options. It retrieves:

- Train schedules to Paris
- A suggested hotel in Paris
- Eiffel Tower details
- Nearby lunch and dinner spots

Step 4: The App Generates Your Timeline

A custom scheduling algorithm takes all those pieces and automatically arranges them into logical, realistic time blocks for your day:

- 09:00 AM – 11:30 AM: Train departure to Paris
- 12:00 PM – 01:30 PM: Lunch at a local restaurant
- 02:00 PM – 03:00 PM: Hotel check-in
- 04:00 PM – 06:00 PM: Sightseeing at the Eiffel Tower

Step 5: You Interact with Your Trip

This schedule is displayed as a day-by-day scrollable timeline on your screen. From here, you can:

Day 1 Jun 12	Day 2 Jun 13	Day 3 Jun 14	Day 4 Jun 15
 Train to Paris 09:00 AM - 11:30 AM Eurostar from London St Pancras \$85.00			
 Lunch at Le Relais 12:00 PM - 01:30 PM Famous steak frites \$35.00			
 Hotel Pullman Paris 02:00 PM - 03:00 PM Check-in and settle down \$250.00 Details →			
 Eiffel Tower 04:00 PM - 06:00 PM Sunset viewing from the 2nd floor.  \$30.00
